

Paper Records Containers

FireKing files carry an exclusive Lifetime Warranty, providing a lifetime investment in document protection. FireKing will replace the file free after a fire. With FireKing Classic Files, the FireKing 25, Insiders Lateral Files and the Card and Check File, there's a FireKing file to meet any need.

FireKing files undergo extensive testing procedures, which include exposing files to temperatures of 1700 degrees for one hour.

FireKing files are equipped with a UL rated key lock, drill-resistant & pick resistant, for added security. All vertical files have a two-position drawer catch, which allows access to certain drawers, while drawers containing sensitive information remain locked.

Files will survive a loaded fall of 30 feet and maintain fire protection. Steel lattice reinforcement offers this impact protection on all six sides.

Steel-lined insulation between drawers makes each drawer a separate fireproof container.

17-11/16"W x 25"D x 52-3/4"H.....\$2480.00

MEET THE TURTLE

A 22-inch deep insulated file from FireKing. Designed for smaller or home offices, it comes in two and four drawer models, both of which hold legal (side-to-side) and letter size (front-to-back) paper in hanging folders.

Insulation is 100% gypsum, oven-dried to reduce moisture to less than 1/2%-eliminating dampness and mildew-and reinforced by a 1' x 2' lattice made of 14 gauge, galvanized welded-steel wire.

Field-replaceable steel panels are up to 50% thicker than other makes of fireproof files

Finish is an environmentally friendly, electrostatic powder coating, up to three times thicker than conventional painted files, applied to all sides, including bottom.

Drawer bodies are built with high sides for use with hanging folders—no additional frames are required.

Drawer Suspensions are maintenance-free and guaranteed for life.

Drawer locks on all files provide general locking of all drawers through either standard key locks or UL-listed high-security locks.

Drawer pulls are surface mounted to allow for extra insulation inside the drawer heads.

Insulation between all drawers makes each one a separate insulated container.

Two-position drawer catch allows access to certain drawers while others remain locked.

Drawer heads are formed of welded steel and filled with gypsum insulation, reinforced with welded wire for additional strength.

Two Drawer File
