

Safes from FireKing

FireKing's offering of fireproof home and office safes assure the protection and peace of mind the homeowner and businessperson demand. These quality constructed U.S. manufactured safes are economically priced in a variety of capacities and configurations to satisfy any requirement, especially those of the person who runs a business from home.

The FS series of safes carry an Underwriters Laboratories Inc. Class 350-1 Hour Insulated Filing Device label. Testing is for fire endurance and explosion hazards. The vaults carry a manufacturer's 1-hour 1700° label.

FireKing 125 3-Hour Fire with Impact-Rated Data Safes

Computer media is so easily damaged, manufacturers recommend computer media not be exposed to temperatures over 125°F or humidity over 85%. Even a hot mug of coffee represents a real hazard, so imagine what a small fire would do. In a FireKing Data Safe, computer media is protected from fire, dust, magnetic fields, unauthorized access, accidental damage and electrostatics. The walls and doors provide the ultimate in protection by incorporating layers of heat-absorbing material, fireproof insulating foam and a tough steel casing. Full access to safe by 90° door opening. LaGard Basic E-Lock on outer door. Three-way bolt work ensures the doors remain shut if a building collapses during a fire or if forced entry is attempted. UL RSC Burglary Rating. Canadian UL Class 52-3-Hour as to fire and impact resistance. Finished in Platinum.
